

Week 4:

- Obtained a dataset obtained from Kaggle containing the OHLC data for various stocks.
- First converted it to xts(Extensible Time Series dataset) to be able to use dygraphs to make interactive visualizations based on the stock data as well as the data present under yahoo stocks.
- Also gone through various other charting libraries such as apexcharter,e4charts, highcharts etc.
- Looked at various types of quantitative plots to be able to incorporate according to the data.
