

## Week 5:

- Working on the OHLC data based on the stocks obtained earlier to be able to find the best charting library to be able to use on the app.
- Compared various plots using two main charting libraries dygraphs and highcharter on the above-mentioned dataset to be able to get the best working one which can produce best visualizations as well as handle large amounts of data.
- Looking for various other interactive qualitative data visualizations such as Radar Charts, radial Charts etc.
- Also working on Treemap type plots.
