

Week 2:

- Read about the basic working of RShiny through the book “Mastering Shiny” by Hadley Wickham, as to how we can build new apps and dashboards with the help of RShiny.
- Gone through various templates available on RStudio & analyzed their codes as well to gain proper knowledge on the building of some basic dashboards.
- Applied my understanding of the topics, on 2-3 basic dashboards which consisted of various options of selecting the inputs and based on them giving the corresponding outputs and graphs with various templates.
- Also, gone through one of the shared templates by “Divad Nojnarg” which involves the use of bs4Dash package enabling us to create more interactive and good-looking interfaces.
