

## **Week 1:**

- Gone through the basics of R viz. various packages under the “tidyverse” package from the book “R for Data Science” by Hadley Wickham & Garrett Grolmund.
- Learnt data visualization with ggplot2, data manipulation and cleaning with the help of dplyr and tidyr etc.
- Hands on practice on these topics on RStudio with the help of examples as well as through practice exercises available on the RStudio website.
- Also tried to implement these on my own on a raw dataset based on COVID-19 patients from different countries.
