Week 3:

• Using a raw COVID-19 dataset to prepare various plots and gain insights as well as some practice on plotting of graphs.

• Read about the plotly package which is also similar to ggplot2 & helps in the visualization of data.

• Read about dygraphs another plotting package used for plotting time series related data as well as gone through tidyquant package which helps is extremely useful for stocks related analysis in R.

• Currently going through the source code of the template dashboard shared as mentioned above.
